Good afternoon, teachers.

I am very glad to be here for this interview. First let me introduce myself.

My name is XX, 25 years old. I come from Weifang, a beautiful city of

Shandong Province. I graduated from Commercial College in July, 2013

and major in finance. Then, I was a teacher in XX, When I was a senior

school student, I was interested in thought and began to read a certain

classic work of Marxism, especially I finished reading "the florilegium of Mao ZeDong". From then on, I have dabbled in more and more theoretical works and accumulated great interests in theory study, especially in Marxism.

I have a dream, a dream of my study. I wish devote my whole life and energy into the development of the Marxism. If I have the opportunity to study in XX University, I'll dabble in as much as document about the specialty as possible. If it is possible, I want to get the primary accomplishment in my major, at least, a stable basis.

Personally, for today's China, the first task to the development of Marxism is a process of construction. That's to say, we should understand Marxism mostly from the aspect of construction and development of social society. Only when our socialistic country has a more rapid and sustainable development than the capitalistic, we can enhance the attractiveness and persuasion of Marxism eventually.

Thank you!

My parents are workers, my father works very hard, and he is always fully occupied, so most of the housework is done by my mother, of course, while I am at home, I would help her. I love my parents and they love me, too. When I make a success, they are more excited than me, and support me to do better. Even though I failed, instead of blaming, they always share sorrow with me, and encourage me not to give up.

During my preparation for graduate examination, the support from my family is always my momentum. Parents' love is unselfish, I am deeply affected, so I will do all what I can to repay them.

There must be many things to learn if I were enrolled into my ideal research field. I hope I can build up a systematic view of XX, especially in the fields of XX. Sincerely, my wish is to get a complete comprehension of XX. On the other hand, I am dreaming of the participation of some relevant projects of my major, for this reason, I will get more experience in practice. And what's more, I expect to continue my study for doctorate degree, if it is possible. In a word, I am looking forward to making up a solid foundation for future profession which is based on three years of study here.

Learning English is the most direct and available method for intercourse among countries and also useful for us to get advanced knowledge and technology from other nations.

模板五：

模板五是比较中规中矩的模板。模板有些长，将自己的家乡、大学情况介绍清楚；也是比较受欢迎的一个模板。大家在准备的时候可以根据个人情况将每一个点都能写成一个小段，老师可能在你介绍的时候打断你，进行相关的提问。

Hello, my professors.It's a fine day today,and I'm very pleased to meet you here.First of all,I'd like to introduce myself to you.My name is XX,my hometown is XX,which is a really beautiful city.Even when i was a young boy,I was very interested in biology science.Every one may have a dream,and I still remember that my dream is to be a biology scientist (just like ZHU KE ZHEN).I liked to make wonders just like,where are we from?Where are we going in the universe?And then I would find the answers in book by myself.Still today I think that interest is the best teacher in one's whole life (and knowledge comes from practice).

Second, I will introduce my major in the university.My major is Biological Engineering in XX University.It has a great relationship with biology science.Their relationship can be shown with an example: Just like a river,biology science,which often finds new discoveries and theories, is at the head of the river.And my major,which lays more stress

on practical use, seems to be at the end of it. When both of them interact well enough, the discoveries and theories in biology science can be soon turned into products in all of the modern industry.

Four years' university education gives me a lot of things to learn, a lot of chances to try, and a lot of practices to improve myself. It teaches me not only what to study and how to think, but also to see the importance of practical ability (such as doing experiment as much as possible). In the university life, I have made many good friends. They help me improve my study and research ability, do everything just like a man, and often give me good example to follow.

Besides what I have introduced myself above, I also have many interests in my spare time. I like playing football, which is an effective way I think to improve my body health, and it can teach me how to join in a group and deal with other people. Drawing and writing is another favor to me.

Above all, I choose the major in order to broaden my view in biology science, and enhance my research ability. I will do my best to join the new group and be good at postgraduate study.
